

## "Pittsburgh Perfect" Fence

Why we use Open Hearth Wire  
in Preference to all other kinds

Remember the iron wire your father and your grandfather had around the farm? Good old wire, wasn't it?

The Special Open Hearth Wire, as we make it today from our own (secret) formula, is more like the old time iron wire than that used in any other make of fence.

It takes longer to make this special Open Hearth Wire, but it excels in strength, toughness and long life, and consequently makes the most serviceable, satisfactory fence. The wire is the very foundation of fence durability.

### A Fine Showing.

Last Saturday afternoon a baking contest was held among the students of the School of the Ozarks and Mrs. A. J. Brazel, Mrs. J. G. Root, Mrs. Chas. Smith, Dr. Chas. Chapin and the editor of the Republican were invited to judge the results.

There were three classes in the contest, bread, cake and pie, and each girl entering was required to submit one specimen in each class. There were seven entries in each of the classes, and it was a hard job to say that any one was better than the other, as they were all very much above the average in appearance and in taste. Each student was allowed to make the kind of cake or pie that she chose and to make a loaf of bread.

Dr. Porter had prepared ribbons for the winners of first and second honors in each class, and the one getting the highest number of points in the three classes was to be awarded a gold medal.

Miss Sidna Casey, of Kirbyville, won first honors in the bread baking contest and Miss Blanche McMichael of Reno, took second.

Miss Drew Everett, of Forsyth, was the winner in the cake baking department and Miss Gentie Pickett of Kirbyville second.

Miss Drew Everett was first in pie baking and Miss Blanche McMichael second.

When the points of the winners came to be totaled for the medal it was found that three of the six had tied for first place and that called for another decision from the judges, who finally decided that Miss Drew Everett was entitled to the medal.

Each exhibit was numbered and the judges did not know who the baker was until they had decided on the merits of the articles.

This contest was organized among the girl students to show the progress being made in that department and to demonstrate that the girls are getting some practical instruction as they go along with their studies. It is a good thing, and we believe was entered into in the right spirit, without any bitterness, but with the whole-hearted purpose of winning if they could. It will probably be made an annual event in the school, and may some day develop into the establishment of department of domestic science. It would not be a bad idea for some of the local people who are interested in the school to offer a medal or something of the sort, each year, to be given to winners in contests of this character.

The school on the hill is getting along very nicely under the management of Dr. Wm. Porter and his corps of teachers and several very good improvements are under way. The people generally in this part of the country take a great deal of interest in the school and as time goes on more interest will be developed by both students and parents.
